

YOUR PROPER DECISION –
FOR SWISS PRECISION AND TIMING

QUALITY YOU CAN RELY ON

Enabling innovation, finding solutions, introducing new technologies – these factors are business as usual at Ateco Tobler AG. In all of this we remain aware of our responsibility toward the environment, which is why we use state-of-the-art manufacturing systems and individually developed products.

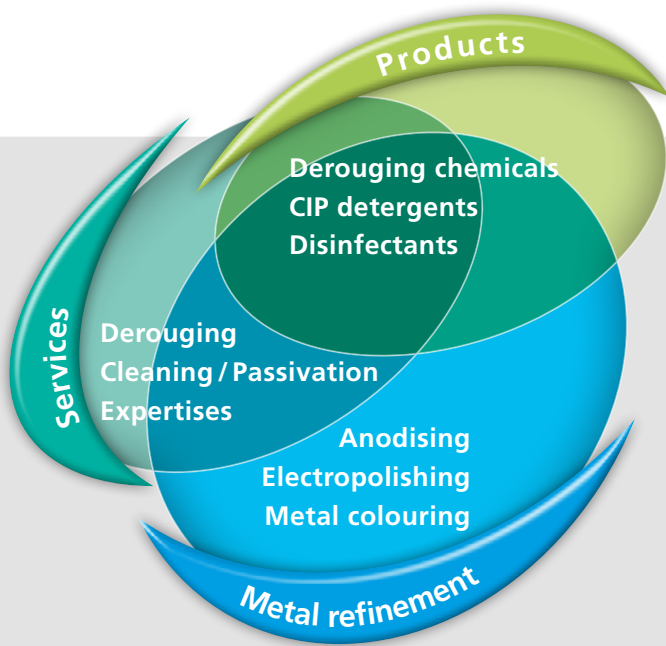

Services – our tailored solutions as your service package

Ateco Tobler AG is specialised in professional services to remove rouge and corrosion on industrial systems and system components made of stainless steel. Our innovative processes are also used to passivate new systems and to remove biofilms on pharmaceutical and biotechnological systems.

Each stage of work is defined in a SOP (Standard Operation Procedure), and a protocol is used to document each executed step. This means that the entire treatment can be traced at any time.

Our service:

- cleaning / degreasing
- passivation
- derouging
- removal of biofilms
- decalification
- pickling
- expertises, etc.

Patents:

Patent for the "Use of an aqueous neutral cleaning solution and method for removing rouging from stainless steel surfaces"

2010 Patent on Invention for Switzerland and Lichtenstein

2011 European Patent

2012 United States Patent

Metal refinement – spotless results thanks to innovation, quality and responsibility

Material surfaces are crucial in ensuring the preservation of functions. Anodising, colouring and electropolishing produce a protective layer that guards against outside influences while offering new options for design.

Our plant in Unterentfelden is specialised in surface refinement and is happy to complete your orders fast and expertly. The collection and delivery service facilitates the processing of orders and helps you protect valuable resources.

Our processes:

- anodising
- metal colouring
- electropolishing
- transport service, etc.

Quality products – in the interest of your safety and the environment

We always take the safe route with chemicals, as well. Our chemicals and detergents are manufactured in GMP production facilities. Complete batch traceability, documentation and analysis certificates are always provided.

Our products

- Derouging chemicals
- chemicals for metal refinement (passivation, pickling, rust removal)
- CIP detergents (alkaline, acid and neutral)
- disinfectants
- products for validation of sterility, etc.

WE KNOW WHAT WE'RE TALKING ABOUT

Ateco Tobler AG is in a position to respond flexibly – anywhere on the European market – thanks to its central company locations. To help you receive an ideal solution, fast and easy. **Our employees are happy to help – just put us to the test.**
